

Custom Designed Sensors

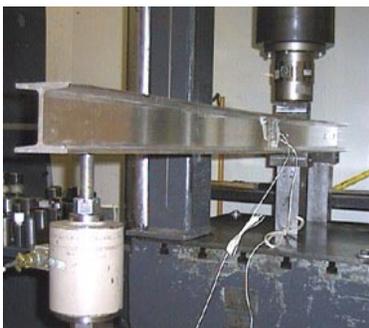

CUSTOM STRAIN GAGING SERVICES

Sensor Developments, inc. is pleased to offer it's services in turning your existing components into a high quality force or torque sensor.

This approach lends itself to customers who need to analyze their production parts without any modification to it's geometry or response characteristics.

Some recent examples include:

- Driveshafts
- Half shafts
- Pneumatic tools
- DC Electric nut-runners
- Tie-rods with optional integrated amplifiers
- Anchor plates
- Struts, Coil Springs
- Brake booster rod
- Steering columns
- Pulley wheels
- Seat frames
- Flight control yokes
- Brake calipers
- Conveyor line links
- Outriggers
- And much more!.
